Sources:

1. Census 2000 (long form sample data).
2. CTPP 2006-2010, 2012-2016, and 2017-2021.

Notes: Totals are more accurate at count and region level than for individual cities, especially in the 2012–2016 and 2017–2021 data sets. CTPP figures tend to under-count total jobs but are useful for comparisons and commuting analysis. CTPP is a special tabulation based on Census Bureau data.
